

Week 10: Explaining Data – Graphs, Tables, and Charts

Unit ILO:

Summarize, describe, and interpret data from visual sources clearly and accurately using technical English and quantitative expressions.

Session 1: Interpreting and Describing Visual Data

Session ILO:

Identify key features and trends in visual data formats (charts, graphs, tables) and describe them using accurate comparative and descriptive language.

Learning Task 1: Chart Reading and Language Identification

Learning Task 2: Sentence Matching: Data + Description

Performance Task (Part 1): Sentence Practice Activity

Language Focus:

- Comparative structures (“higher than,” “more stable than,” “as much as”)
- Trend phrases (“increased steadily,” “remained constant,” “dropped sharply”)
- Quantifiers and time phrases (“by 10%,” “from 2020 to 2023”)

////////////////////////////////////

Learning Task 1: Chart Reading and Language Identification

Instructor presents 3 visual data formats:

- Line graph
- Bar chart
- Table

Label features:

- Axes and units
- High and low points
- Overall trend

Learning Task 2: Sentence Matching: Data + Description

Match sentences to the correct visual data

.

Performance Task (Part 1): Sentence Practice Activity

Select one graph or table from a worksheet and write:

- 3–4 sentences describing trends, comparisons, and values

→ Pair sharing: Read sentences aloud; partner confirms if they match the data.

Session 2: Writing a Data Summary

Session ILO:

Write a clear and concise paragraph summarizing data from a graph or chart using appropriate descriptive language and structure.

Learning Task: Data Summary Model and Language Breakdown

Performance Task: Write a 100-Word Data Summary

Language Focus:

- Summary adverbs (“overall,” “notably,” “in contrast”),
- precise quantifiers (“a slight increase,” “a significant drop”),
- present simple for general descriptions.

////////////////////////////////////

Learning Task: Data Summary Model and Language Breakdown

Read a model 100-word paragraph describing a production chart. Underline:

- Topic sentence
- 3–4 key data points
- Transitions and summary sentence

Performance Task: Write a 100-Word Data Summary

Choose a new graph or table from a real engineering source.

→ Write a 100-word paragraph that includes:

- Introduction (what the data shows)
- 2–3 trend descriptions with numbers
- Overall interpretation or prediction

→ Peer partner checks for clarity and technical language use before final submission.

Week 11: Explaining Data to the Class

Performance Task: Present your data to the class.

Performance Task:

Present your data to the class.
