

# SOPs

## Unit: Writing Standard Operating Procedures (SOPs)

Context: Semiconductor / Cleanroom / Engineering Work

### Cleanroom Entry Procedure

Procedure:

1. Cover shoes with disposable shoe covers.
2. Put on a hairnet and ensure full hair coverage.
3. Wash and dry hands thoroughly.
4. Wear cleanroom suit and secure all fasteners.
5. Put on cleanroom boots and adjust straps.
6. Put on gloves without touching outer surfaces.
7. Enter the air shower and rotate 360°.
8. Exit the air shower and enter the cleanroom.

Safety Notes:

- Do not touch contaminated surfaces after wearing gloves.
- Ensure all PPE is properly secured before entry.

## **PART 2 — ENGINEERING ANALYSIS (NOT LANGUAGE GUESSING)**

### Task 1: SOP Logic Analysis

Answer in full sentences.

Why are the steps numbered instead of written as a paragraph?

---

What would happen if Step 3 (wash hands) is skipped?

---

Identify ONE step where contamination risk is highest. Explain why.

---

## PART 2 — ERROR DETECTION

### Task 2: Identify Critical Errors

A technician writes this SOP:

Enter air shower

Put on gloves

Wash hands

Wear hairnet

Your tasks:

A. Identify at least 3 errors

---

B. Explain the safety risks

---

C. Rewrite the correct SOP (minimum 5 steps)

---

## PART 3 — LANGUAGE PRECISION

### Task 3: Fix Weak Instructions

Rewrite using professional SOP style:

You should put on gloves carefully

Ensure the gloves are put on to both hands without touching the outter surface

---

Then check everything is okay

Staff must ensure each tests on the list is passed.

---

Make sure your clothes are correct

Workers are required to wear the clothes according to the sign.

---

After that, go inside

Ensure you completed the steps shown above before entering the room.

---

#### Task 4: Upgrade to Technical Language

| Basic Word | Engineering Term |
|------------|------------------|
| clothes    |                  |
| things     |                  |
| check      |                  |

## PART 4 — PROCEDURE DESIGN

### Task 5: Plan a Professional SOP

Choose Procedure.

Required Structure:

Title: \_\_\_\_\_

Purpose (1 sentence):

---

Equipment (3–5 items):

---

---

---

---

Procedure (6–8 steps):

---

---

---

---

---

---

---

Safety Note:

---

---

## PART 5 — PEER REVIEW

| Criteria              | Yes                      | No                       | Comment |
|-----------------------|--------------------------|--------------------------|---------|
| Imperative verbs used | <input type="checkbox"/> | <input type="checkbox"/> |         |
| Logical sequence      | <input type="checkbox"/> | <input type="checkbox"/> |         |
| No missing steps      | <input type="checkbox"/> | <input type="checkbox"/> |         |
| Technical vocabulary  | <input type="checkbox"/> | <input type="checkbox"/> |         |
| Safety included       | <input type="checkbox"/> | <input type="checkbox"/> |         |
